

SUNBAL AZIZ

Software Engineer | Full-Stack Developer | AI/ML

sunbalazizlcwu@gmail.com | +923184636678 [linkedin.com/in/sunbal-aziz-lcwu](https://www.linkedin.com/in/sunbal-aziz-lcwu) | Lahore, Pakistan | Open to Full-Time & Remote Roles

PROFESSIONAL SUMMARY

Software Engineering graduate (June 2026, LCWU) with hands-on experience in full-stack web development, AI integration, and data analysis. Completed a 4-month web development internship and earned 10+ industry certifications across AI, Python, APIs, and project management. Skilled in React, Python, C++, and REST APIs. Passionate about building intelligent, user-facing products. Actively seeking full-time opportunities in software engineering, AI/ML, and full-stack development.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C, SQL

Frontend: React, HTML5, CSS3, Responsive Design

Backend & APIs: REST APIs, Flask, Postman, OpenAPI / OpenAPI Fundamentals

AI / ML / Data: Prompt Engineering, Generative AI, Machine Learning, Data Analysis (Python), scikit-learn

Databases: SQL, Relational Databases (IBM certified)

Tools & Platforms: Git, GitHub, VS Code, Databricks, Linux Foundation tools

Soft Skills: Problem Solving, Project Management, Agile Collaboration, Technical Communication

WORK EXPERIENCE

Web Development Intern

CodeAlpha • Remote

Apr 2025 – Jul 2025

4 months

- Built and deployed responsive web interfaces using HTML5, CSS3, JavaScript, and React, improving UI consistency across multiple client-facing pages
- Integrated third-party REST APIs to connect frontend components with backend services, reducing manual data-handling steps by an estimated 40%
- Developed reusable React components and maintained a shared component library, cutting new-feature development time for the team
- Collaborated in a remote agile team using Git for version control, participating in code reviews and daily standups
- Debugged and optimised page-load performance across 3 web projects, improving Lighthouse scores from ~60 to 85+

PROJECTS

AI-Powered Resume Analyzer

2025

React · Python (Flask) · Claude API · REST API

- Built a full-stack web app that accepts resume uploads and returns structured AI feedback using the Anthropic Claude API via prompt engineering
- Designed a clean React frontend with drag-and-drop file upload and a Python Flask backend exposing a REST endpoint
- Applied advanced prompt engineering techniques (few-shot prompting, role prompting) to generate ATS-optimised suggestions
- Demonstrates: full-stack architecture, REST API design, Claude API integration, prompt engineering

Data Analysis Dashboard — Pakistani Salary Trends

2025

Python · Pandas · Plotly · Streamlit · SQL

- Cleaned and analysed a 5,000+ record salary dataset using Pandas, identifying key trends across industries, experience levels, and locations
- Built an interactive Streamlit dashboard with Plotly charts, enabling drill-down filtering by role, city, and skill set
- Wrote SQL queries to aggregate and validate data against a relational database before loading into the analysis pipeline
- Demonstrates: data analysis, Python data stack, SQL, data visualisation, IBM Data Analysis certification skills

Full-Stack Task Management App

2024

React · Node.js · REST API · SQL Database

- Developed a CRUD task management application with user authentication, task creation, deadlines, and priority tagging
- Built a RESTful Node.js backend with SQL persistence; consumed via Axios in a React SPA with context-based state management
- Implemented JWT-based authentication and protected routes, handling session expiry and refresh logic
- Demonstrates: full-stack architecture, REST API design, database integration, authentication patterns

ML Classification Model — Spam Detector

2024

Python · scikit-learn · Pandas · Streamlit

- Trained a Naive Bayes and logistic regression classifier on a 10,000-email dataset, achieving 97% accuracy on the test set
- Performed feature engineering using TF-IDF vectorisation and evaluated models with precision/recall/F1 metrics
- Wrapped the final model in a Streamlit UI allowing users to paste text and receive an instant spam/ham classification
- Demonstrates: machine learning fundamentals, Python data science stack, model evaluation, Generative AI & ML certification skills

EDUCATION

Bachelor of Science — Software Engineering

Lahore College for Women University (LCWU), Lahore, Pakistan

Sep 2022 – Jun 2026

CGPA: [3.1]

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Software Engineering, AI/ML Fundamentals

CERTIFICATIONS

- | | |
|---|----------|
| • Data Analysis with Python — <i>IBM</i> | Jun 2026 |
| • AI and Career Empowerment — <i>University of Maryland</i> | Jun 2026 |
| • AI Fluency: Framework & Foundations — <i>Anthropic</i> | Jun 2026 |
| • Claude Code in Action — <i>Anthropic</i> | Jun 2026 |
| • Postman API Fundamentals Student Expert — <i>Postman</i> | Apr 2025 |
| • SQL and Relational Databases 101 — <i>IBM</i> | Apr 2025 |
| • Prompt Engineering for Everyone — <i>IBM</i> | Mar 2025 |
| • Problem Solving (Intermediate) — <i>HackerRank</i> | Mar 2025 |
| • LFEL1011: OpenAPI Fundamentals — <i>The Linux Foundation</i> | Mar 2025 |
| • Fundamentals of Predictive Project Management — <i>Project Management Institute</i> | Mar 2025 |
| • Academy Accreditation — Generative AI Fundamentals — <i>Databricks</i> | Mar 2025 |

ADDITIONAL INFORMATION

Languages: Urdu (Native), English (Professional)

Interests: Open-source contribution, AI product development, API design, technical writing

Availability: Immediately available for full-time, remote, hybrid, or on-site roles
